

Fuldtidsarbejdsløshed		Kilde: Uddannelses- og Forskningsministeriets statistik over arbejdsløsheden op til 20 kvartaler efter fuldførelse																						
Kandidatuddannelser		Man ser på årgangene (inden for et studieår ifølge person fra min.) og følger dem op til 20 kvartaler efter fuldførelse - til 20. sept. 2013. Nyere uddannelser rummer jo ikke alle årgangene og kvartalerne.																						
OKJ 15. jan. 2015		Der hvor der er * er hvis årgangen er på under 10 personer - så har man anonymiseret . Der hvor der ikke er tal er der blankt.																						
Dok. Indfasning-arbl.tal		Gennemsnittene er for alle de institutioner der der udbyder pågældende uddannelse. Hvis et gennemsnit omfatter flere flere institutioner er det anført. For nogle af de små fag er der ikke årgangs-analyser da tallene er for små - men der er gennemsnit fordi man her kommer over 10 personer. Med rød/gul er markeret de uddannelser som har høj samlet ledighed for årgangene. Grøn markerer lav ledighed. I de undersøgte årgange kommer Litteraturvidenskab samt Film- og Medievidenskab bedre ud en normalt.
